#### Regional Airline Association (RAA) Says More Small Communities Will Lose Service

In an exclusive interview with *The Points Guy*, Faye Malarkey Black, the Regional Airline Association's (RAA) CEO, said that she believes more small communities will lose air service due to the increasingly difficult regional airline pilot shortage.

The RAA is the regional airline industry's voice in Washington, DC, advocating before Congress and the federal government on behalf of its 17 member airlines in the US and Canada. Black joined the group in 1998 and has led it since 2015.

The RAA says it's a bleak picture for small communities that rely on air service from regional carriers.

It cites data that shows how much capacity regional airlines are cutting this spring. For example, GoJet, which operates as United Express, will see a 28% year-over-year capacity cut this May. Horizon Air, which operates regional flights for Alaska Airlines, will see a 31% capacity cut compared to May 2021.

"Unfortunately, I think more loss is inevitable," she said in an interview with *The Points Guy.* "I think no matter what we do right now, more communities are going to lose air service.

"The time to fix the pilot shortage was four or five years ago. At this point, we are trying to correct a problem."

Black said that most of the nation's airports are served exclusively by regional airlines and that no one should expect mainline carriers to come in if regionals leave.

"Major airlines only serve directly 34% of the nation's commercially served airports," she said. "Everywhere else relies on a regional."

Early retirements at the major airlines during the early stages of the COVID-19 pandemic coupled with an estimated 13% of pilots who will hit the mandatory retirement of age 65 within the next five years has put this pilot hiring cycle "on steroids," Black said.

"So you have pressure at both ends where the recruitment is taking place from the pilot ranks of the regional airlines, and the number of pilots coming into the pilot pipeline are thinner than ever," she said.

With a crush of new pilots joining regionals, as well as pilots departing regionals for mainline carriers, there's also a rise in demand for flight simulator time. Few regional airlines are equipped to handle that crush due to a limited supply of flight simulators.

At some regional airlines, it is taking new hires as long as six months to get from their initial classes to the simulators thanks, in part, to the lack of simulators owned by regional airlines.

Black said that the increased number of training events also leads to increased demand for line check airmen — These are pilots who would otherwise be operating regular flights, so it further strains the supply of pilots.

"You're going to take a pilot out of duty to become a line check airman," she said.

Black estimates that it will take between four and five years for regional airlines to return to their prepandemic number of departures.

### Airfield Infrastructure including Runways, Taxiways, Aprons, Approaches and Navaids

- Runway 22: This is the primary runway and the only runway with a precision approach or an Instrument Landing System. Aircraft can land with 200 foot ceilings and a ½ mile visibility. The airport owns and maintains a Precision Approach Path Indicator (PAPI) on this runway end.
- Runway 04: This is the second most utilized runway. This runway has a non-precision GPS approach with the lowest minimums being 200 feet ceiling and ¾ mile visibility. The FAA owns and maintains the PAPIs and Runway End Identifier Lights (REIL) on this runway. The threshold on Runway 04 was relocated in 2016, adding an additional 400' for landing on this runway. A 400' displacement still exists on this runway.
- Runway 04/22 was last completely reconstructed sometime in the early 1980's and an 800 ft. extension was added in the late 1990's on the Runway 22 end. An FAA funded project to complete some partial/full panel repairs, joint sealing and remarking is expected to begin in May 2022.
- A strategic plan action item is to study the cost/benefit of adding approach lights to Runway 04. This review will be done as part of our Master Plan update which is expected to start in 2022.
- Runway 14/32: This is our crosswind runway. Currently only visual or circling approaches with higher minimums exist to this runway. The FAA will consider the possibility of GPS approaches to both runways once the Airport Layout Plan showing these approaches is approved. It is highly unlikely we will get very low minimums at this time on Runway 32 due to the large number of obstructions in the approach path. Runway 14 may be able to obtain lower minimums.
- Runway 14 has a PAPI and REIL and Runway 32 has a PAPI all owned and maintained by the airport. The FAA has indicated a REIL must be added to Runway 32. This will be added into a future FAA funded project but will be owned and maintained by the airport.
- Improvements to extend the life of this runway were completed in 2020.
- Taxiway A: This taxiway is the full parallel taxiway serving Runway 04/22. It has recently been reconstructed from taxiway C south to taxiway A4. Taxiway A from taxiway C north and connector taxiways A1, A2 and A3 are in need of joint replacement, some partial/full panel repairs and remarking which is expected to be completed via an FAA funded project starting in May 2022. Taxiway A lighting from B2 to A1 was replaced in the Fall 2020.
- <u>Taxiway C</u>: This taxiway is the full parallel taxiway to Runway 14/32. It was reconstructed from taxiway C2 to taxiway C1 in 2010. The taxiway was reconstructed from taxiway connector C2 to C4 in 2016.
- <u>Taxiway E</u>: This taxiway provides access from the south hangar area to runways 22 and 14/32. Taxiway E is in good condition with periodic remarking needed.
- <u>Taxiway F</u>: This taxiway provides access to runway 04 from the south hangar area. Taxiway F requires occasional crack sealing and remarking but is otherwise in good condition.

- Hangar Taxiways: The taxiways leading to our north hangar areas were reconstructed in 2005/06 and are in good condition. The K-row taxilane was constructed in 2005 and the N-row in 2018. Some work on the K-row taxilane storm drains and an expansion of Taxilane L will occur with the construction of the new 48'x48' hangars in 2022. Occasional crack sealing is needed on all hangar taxiways.
- <u>Terminal/FBO apron</u>: All areas were joint sealed and partial/full panel repairs were completed in 2015. The north end of the apron had some asphalt portions removed and replaced in concrete and a concrete section was also added to the south end of the apron in 2014/15.

#### **Mowing Operations**

- Landside areas adjacent to sidewalks and roads are maintained at 3-6" grass height.
- Landside areas beyond about 20' from roads and sidewalks are kept at 6-12".
- Areas adjacent to airfield pavement are maintained at 3-6" grass height.
- Airfield areas beyond 12' from pavement are kept at 6-18".
- Remote areas that are able to be mowed are maintained on an annual or bi-annual basis. Additional mowing areas will be created with the fence project in 2023.

#### Mowing Equipment

Mowing equipment is not eligible for federal funds. The airport owns the following mowing equipment.

- 1. 2020 Toro Groundsmaster 4110 mower with a 10'6" finish deck
- 2. 2014 Tool Cat 5600 with a 72" finish deck
- 3. 2020 NewHolland T6.155 Tractor with John Deere 20' wide pull behind deck (mower purchased in 2015)

### **Snow Removal Operations**

- The annual airplane operation count for this airport requires a clearance time for Runway 04/22 and Taxiway A in one hour.
- Halliday Technologies RT3 Flight continuous friction measuring equipment (CFME) is used to conduct friction testing during winter operations. This device was purchased in 2014 and is a very consistent tool for providing friction testing.
- Notices to Airmen (NOTAMs) are issued by the airport maintenance staff using a digital format. The device used for recording friction testing also allows the maintenance personnel to update NOTAMs right from the vehicle which allows for the most up to date reporting of conditions possible.
- Changing FAA requirements for reporting runway conditions has placed a greater focus on sweeping operations and use of chemicals to remove contaminants from the runway. The airport grounds maintenance budget has been adjusted in recent years to account for additional funds for chemicals and the airport recently purchased new equipment to facilitate greater sweeping capabilities.

• Airport maintenance personnel are responsible for determining airfield clearing priorities depending on conditions and time of day. The following priority list is used as a guide.

#### o Priority 1

Runway 4/22
Parallel Taxiway Alpha and connectors A1 and A4
Mayo One Emergency Helicopter response pad

Taxiway Bravo
K-row Access Road
Taxiways Echo and Foxtrot

#### o Priority 3

NAVAID Access Roads Perimeter Road past Station 8 North Hangar Area South Hangar Area Fuel Farm Area South GA Ramp

#### Snow Removal Equipment

- Additional snow removal equipment purchases to replace aging equipment is planned for FAA funding in the next couple of years.
- One challenge with new equipment is ensuring the size of the equipment is able to fit into our existing maintenance facility. A new bay and expansion of the door on an existing bay was completed in 2021 to accommodate larger equipment.
