SUPPLEMENTAL INFORMATION FOR A REZONING PETITION

In order to process your application as quickly as possible, please fill in all of the sections below that are applicable to your request, and attach all appropriate maps or plans described below that are relevant to your request.

Describe the reason(s) for your rezoning request:

□ When evaluating a rezoning petition, staff from the Eau Claire County Department of Planning and Development consider whether the purpose of the proposed zoning district and the uses allowed in the district are appropriate for the selected location. Staff also considers whether the change in zoning will uphold the purpose of the zoning ordinance, which is to separate incompatible land uses from one another, to maintain public health and safety, to protect and conserve natural resources, to prevent overcrowding, to preserve property values, and to maintain the general welfare of the citizens. Please describe how the proposed zoning district and the uses allowed in that district are appropriate for the selected location, and how the proposed change in zoning will uphold the purpose of the zoning ordinance.

□ Rezoning petitions to change the zoning of a parcel from the A-P Agricultural Preservation District to any other District must be based upon findings that consider the following factors:

- 1) The land is better suited for a use not allowed in the A-P Agricultural Preservation zoning district based on a review of soil types, historical productivity, location, and adjacent land uses;
- 2) The rezoning is consistent with any applicable comprehensive plans;
- 3) The rezoning is substantially consistent with the certified Eau Claire County Farmland Preservation Plan; and
- 4) The rezoning will not substantially impair or limit current or future agricultural use of surrounding parcels of land that are zoned for or legally restricted to agricultural use.

If you are petitioning to rezone land from an A-P District to another district, please describe how the proposed change in zoning will be consistent with the four findings listed here.
